Abstract. This study evaluates the role of fiscal policy in facilitating economic recovery in the post-pandemic era. By analyzing government spending and taxation strategies, the paper assesses their effectiveness in revitalizing economies hit by the COVID-19 pandemic. The findings highlight the importance of targeted fiscal measures to support growth and stability, suggesting that well-designed fiscal policies are crucial for a robust economic recovery.

Keywords: Fiscal Policy, Economic Recovery, Post-Pandemic, Government Spending, Taxation

Introduction

The COVID-19 pandemic has posed unprecedented challenges to global economies, necessitating effective fiscal policy responses to aid recovery. This article examines the role of fiscal policy in driving economic recovery during the post-pandemic era, focusing on government spending and taxation strategies. By analyzing case studies and economic data, the research evaluates the effectiveness of various fiscal measures in supporting growth and stability. The findings emphasize the need for targeted and adaptable fiscal policies to ensure a swift and sustainable economic recovery.
